

Michael Kearns

Phone: (508)-315-7432 | **Email:** mkearns1@student.framingham.edu

Summary: Michael is passionate about technology and is always learning and evolving.

#Skills

HTML, CSS, JavaScript, Git, Github

#PROJECTS

Personal:

Nature Brochure (HTML, CSS flexbox, JS) Demo

Created a responsive design

Implemented JavaScript to create a smooth scroll navigation bar

Movie Comparison App (HTML, CSS, JS) Demo

Pulled data from the omdbApi

Retrieved two different movies from the user to compare their statistics

Displayed the results onto the screen for the user to see (e.g. higher statistic highlighted in green, lower statistic highlighted in yellow)

Other Projects available at michaelkearnsportfolio.com

School:

BUIS 460 Information Systems Management / Capstone Project (Built a website for a nonprofit)

Modernize a website for a nonprofit by improving its usability and design

Acted in a leading role on team of three to help consult the client at various stages of development for feedback

Iterated through versions of the product to ensure the requirements were met

CSCI 360 Database Management / Database Design Project

Designed, built, documented, and presented a functional database for a university

Worked effectively in a team of 5 with well-established roles and responsibilities

Stored and analyzed information about university students, staff, classes, and schedules

#Professional Experience

Stop and Shop Supermarket / Courtesy Clerk

June 2012 – Present

Provided assistance to shoppers by helping them load groceries into their cars

Developed exceptional personal skills to get along with others and work as a team

Attleboro Enterprises, Inc. /

Volunteer: Non-profit human service organization for adults with diverse developmental challenges

September 2018 – December 2018

Effectively executed a predefined process to digitize hundreds of confidential client paperwork

Devised a system for data collection and entry to maintain up to date client contact information

Digitally transformed the company by making the client data more available to its IT systems (e.g search, reporting)

#Education

Framingham State University / Bachelors of Science in Business and Information Technology
